Don Plain, California Department of Health Services

RCRA STATUS

Kaiser Aluminum has been listed in the Resource Conservation and Recovery Act (RCRA) as a generator since August 14, 1980.

CONCLUSIONS

Ecology and Environment, Inc. (E & E) conducted an original Preliminary Assessment (PA) at Kaiser Aluminum in October 1987. E & E recommended no further action because of insufficient target population.

California Department of Health Services (DOHS) identified two Kaiser facilities in Cupertino, California with two EPA ID numbers. After research, DOHS found that there is actually only one Kaiser facility. Therefore, DOHS did not conduct a PA.
